

Interlock Sealing

Pile Lock

Pile Lock is the best option when the sealing needs to be completely waterproof. This product expands up to 20 times its original volume when it comes into contact with water. This way we can guarantee a 100% waterproof solution. We have the unique exclusive right within Europe for Pile Lock lock seals with plastic (PU).

Pertex Bituminous filling

This type of interlock sealing is very interesting from an economic point of view and reduces leaking to a large extent.
